Ladder Safety Training

The information provided in this course is to help you eliminate incidents resulting from unsafe use of otherwise safe ladders, and the use of unsafe ladders, through adoption and practice of a comprehensive 3- Step Ladder Safety Program, incorporating the following elements of: Selection, Set up, and Service. Whether you are an Employer, Safety Official, or Homeowner, if you use a ladder – regardless of frequency – or you are responsible for others that do, we believe that the 3 Steps to Ladder Safety will help you identify, and eliminate or manage, the majority of hazards associated with working with ladders.
