## Liftruck Operators Safety Training

In Ontario today, Liftruck accidents injure and take the lives of operators and other workers. To stop this, we must learn not only how people can get injured, but more importantly what must be done to prevent harmful situations in the first place. The classroom course addresses information concerning key safety practices and procedures required for operators of liftrucks. This course includes in house verification and evaluation of the participants operational safety skills on specific liftruck and related equipment.
